The average salary depends on where you work and primary or secondary education. Physical education teachers could also earn extra money as coaches of sports teams, especially at the high school level. The average salary for high school teachers in the United States was \$53,230 in May 2010, according to the Bureau of Labor Statistics. Elementary school teachers in Illinois made an average salary of \$51,380 per year, the BLS reported. Wages vary widely in different parts of the country. The salaries of high school teachers range from less than \$35,020 for the lowest paid 10 per cent to more than \$83,230 for the top 10 per cent. Many physical education teachers supplement their salaries with money from the training school or local teams. Teachers, whether in primary or secondary schools, all have a minimum bachelor's degree. Physical education teachers generally have a strong command of physical education, taking subjects such as kinesiology, exercise physiology and the administration of physical education. Public school teachers are generally certified by their state; teachers in private schools may not be required to obtain a teaching certification. Physical education teachers do more than teach the gym. In many schools, physical education teachers also train sports teams at school or teach health classes. Gym classes often include swimming, golf, tennis, archery, basketball, gymnastics, dance, soccer or baseball. Physical education teachers must be well versed in a variety of sports and physical activities. Teaching openings in general are growing more slowly than many other jobs. The secondary school teachers will increase by 7% between 2010 and 2020, slower than average, according to the BLS. Primary teacher employment increased by about 17 per cent over the same period, which is around the average. A mastery and willingness to take on extracurricular tasks such as coaching school teams could increase your chances of being hired.
